

**Brighton, Michigan** - June 16, 2004

**McKenzie Bay International Ltd. (OTC:MKBY.PK)** has signed an Agreement with the **Dapco Industries** to perform data collection for a **WindStor<sup>SM</sup>** configuration at their Dexter, Michigan location that includes two surface mounted **DERMOND Wind Turbines**.

McKenzie Bay intends to sell onsite generated electricity to Dapco at a fixed rate under a long-term supply arrangement through its **WindStor Power Co.** subsidiary. *WindStor*, using wind energy from *DWTs*, could reduce existing electricity costs by more than 5.0% while minimizing the impact of future rate increases for grid-supplied electricity. McKenzie Bay expects to have collected adequate wind information before the end of the year to confirm installation economics.

The Dapco Agreement originated through McKenzie Bay's agent, **MTI Lighting Specialists, Inc.** of Brighton, Michigan.
